

PrestaShop module

Merchant Integration Manual

2016-03-01

Features

- Adds EveryPay card payment gateway service to the PrestaShop installation for supporting Visa and MasterCard payments.
- Enables embedding the payment form to the checkout workflow in iFrame.
- One-click-payments allow returning customers to perform payments faster and easier using saved card details.

iFrame payment form:

A screenshot of an iFrame payment form. At the top left, there are logos for MasterCard and VISA. The title "Maksa kaardiga" is centered at the top. Below the logos, there is a text input field containing the card number "5168 8321 3636 0487" and a small MasterCard logo. Underneath is a text input field for the name "John Doe". Below that are two smaller input fields: one for the expiration date "10 / 18" and another for the CVV "119" with an information icon. A large blue button labeled "Maksa €61.19" is positioned below the CVV field. At the bottom, there are logos for "Verified by VISA" and "MasterCard SecureCode".

One-click-payments:

Requirements

The extension has been tested to work with the following software versions:

- PrestaShop 1.5.6.x and PrestaShop 1.6.1.x
- PHP 5.3.3 and above

The module should also work with other versions of 1.5.x and 1.6.x (untested)

- Prestashop 1.7 module works with Prestashop version 1.7

Installation

- Download the [latest version](#) ZIP file (for 1.5 and 1.6) and [latest version](#) ZIP file (for 1.7).
- Go to the Back Office and open “Modules” from main menu.
- In the upper right corner of the screen locate the button “Add new module”. • Upload the ZIP file.
- Locate the EveryPay module in the list, scrolling down if necessary.
- In the row for the new module, click **Install**. • Locate the module and click >> **Configure**.

Configuration

Once the module is activated configuration options for EveryPay gateway can be found in PrestaShop admin interface under 'Modules and Services' -> 'EveryPay'

Everypay

EveryPay is a card payment gateway service provider, enabling e-commerce merchants to collect credit and debit card online payments from their customers.

SETTINGS

Live Mode On
 Off

Token payments On
 Off

* Payment form type

iFrame skin
Appearance of the payment form can be customized in EveryPay Merchant Portal, under "Settings" > "iFrame skins".

Description
This controls the description which the user sees during checkout.

* Processing Account
You'll find this in EveryPay Merchant Portal, under 'Settings' > 'Processing accounts' section (looks like: EUR1).

* API Username
You'll find this in EveryPay Merchant Portal, under 'Settings' > 'General settings' section (looks like: 49bcd66ed983c12).

* Shared Secret
You'll find this in EveryPay Merchant Portal, under 'Settings' > 'General settings' section (looks like: e7ed4e55d5f73158f6c2890fb1c950e).

Test API Username
Optional: API username for testing payments.

Test Shared secret
Optional: API secret for testing payments.

EveryPay has two separate Merchant Portals:

Live/production: <https://portal.every-pay.eu/>

Test/demo: <https://mwt-demo.every-pay.com/>

Please ensure that you access the correct environments.

Field name	Description
Live Mode	On - module uses Live server, Off - module uses test server (this is for testing only- then Test API Username and Test Shared secret are in use)
Token Payments	Enables one-click-payments which allows returning customers to save their card details (a reference token to required card information in EveryPay system) for faster and easier payments in the future.
Payment form type	iFrame - payment form is embedded in the checkout workflow. Redirect - after checkout the buyer is redirect to EveryPay payment page
iFrame skin	Specifies the skin name, configured under Merchant Portal settings. Default value is 'default' which has standard EveryPay payment form design.
Description	This controls the description which the user sees during checkout in Payment Confirmation page. Free text in HTML-format can be added.
Processing Account	Processing accounts are defined in EveryPay Merchant Portal. LIVE: https://portal.every-pay.eu/merchant_settings/processing_accounts TEST: https://mwt-demo.every-pay.com/merchant_settings/processing_accounts Looks like this: EUR3D1 or USD3D1
API Username/secret	Everypay Live and Test servers have different API credentials. API settings are defined in EveryPay LIVE Merchant Portal: https://portal.every-pay.eu/merchant_settings/general
Test API Username/secret	Everypay Live and Test servers have different API credentials. API settings are defined in EveryPay TEST Merchant Portal: https://mwt-demo.every-pay.com/merchant_settings/general

Test cards

Please note that only test cards must be used for testing. The following test cards can be used to perform successful test payments:

Card type	Card number	Expiration date	CVC code	Cardholder name
Mastercard	5168830763287080	10/21	949	(any name)
Visa	4761739001010010	09/25	179	(any name)
Mastercard	2223000010021381	12/19	656	(any name)

The 3DS authentication simulator (Poseidon bank) password is **secret**. To test failed payments, the easiest ways are to enter incorrect expiration date or incorrect 3DS password.

Changelog

Date	Change
2018-10-25	Changed Mastercard test card out for a new one, added Mastercard test card with 22 beginning
